Connect to an EC2 Instance by Using RDP [Guided] (14 Minutes Remaining)

Instructions Resources Help 100%

- Select **Create security group**.
- In Security group name, enter **RDP SG-32702200**, in Description, enter **Allows RDP**, and then in VPC, ensure that **Challenge VPC** is selected.
- In Inbound rules, select **Add rule**.
- In the Type drop-down list, select **RDP**, and then in the Source type drop-down list, select **Anywhere - IPv4**.

Cancel Create security group

Normally you would lock down RDP to a specific IP address or CIDR range for security, but for this challenge, leave it set to Anywhere.

You can also create a security group when you configure an EC2 instance.
